1949 Panhead Engine

The panhead is an OHV Harley-Davidson motorcycle engine, so nicknamed because the rocker covers resembled cooking pans. The engine is a two-cylinder, two-valve-per-cylinder, pushrod V-twin, made in both 61 c.i. (EL) and 74 c.i. (FL, FLH) displacements. The Panhead engine replaced the Knucklehead engine in 1948 and was manufactured until 1965 when it was replaced by the Shovelhead.

Harley-Davidson Panhead engine - Wikipedia

File Type PDF 1949 Panhead Engine design, one that would carry the company through the next 17 years. The hydraulic-valve "Panhead" engine was introduced in 1948, and the telescopic front forks that gave the bike its name came out the next year. Powering the Hydra-Glide was a 74

1949 Panhead Engine - trattorialabarca.it

After bringing out the refined Panhead engine the previous year, Harley's big news for 1949 was the introduction of "Hydra-Glide" front forks. Replacing the former leading-link forks, Hydra-Glide was a modern telescopic design that provided greater travel and a much higher level of riding comfort.
