Amazon.com: led grow lights
I've never seen a grow spot of that low a wattage....are you trying to use LED household bulbs? If so, they help nothing, really. If they ARE "50 true watts", then their PAR bandwidth production and light intensity (at proper heights) is about the equivalent of half a 250 watt HID, or (between changed footprint and ability to get better penetration) about "300 watts" of CFL...to the individual plant it can hit well.

Can I grow weed with 50w led lights? | Grasscity Forums ...
Luxx Lighting is a group of hands-on, southern California cultivators that believe, "If you don't do it, you don't know it". We are constantly testing, and when we find what works best, we challenge ourselves to make it better.

SolarXtreme® Series Full Spectrum LED Grow Lights
A LED Plant Grow Light is one of the many grow lights available that works using diodes. LED stands for "light-emitting diode" to provide plants with the light they need to grow when there is not enough sunlight available. As you will see, LED Plant Grow Lights have many advantages over other types of grow lights.
