Spark Release 2.2.0. Apache Spark 2.2.0 is the third release on the 2.x line. This release removes the experimental tag from Structured Streaming. In addition, this release focuses more on usability, stability, and polish, resolving over 1100 tickets. Additionally, we are excited to announce that PySpark is now available in pypi.

Spark Release 2.2.0 | Apache Spark

SparkSession: Prior to Spark 2.X, there were different entry points for different Spark jobs; that is, for Spark SQL we had sqlContext and if Hive features were also required then HiveContext was the entry point. With Spark 2.X this ambiguity has been removed and now we have one single entry point called SparkSession.

Apache Spark is an open-source distributed general-purpose cluster-computing framework. Spark provides an interface for programming entire clusters with implicit data parallelism and fault tolerance. Originally developed at the University of California, Berkeley's AMPLab, the Spark codebase was later donated to the Apache Software Foundation, which has maintained it since.

Apache Spark - Wikipedia

When `_` is used on its own it represents an argument in the anonymous function. So if we working on pairs: `map(_._2 + _._2)` would be shorthand for `map(x, y => x._2 + y._2)`. When `_` is used as part of a function name (or value name) it has no special meaning. In this case `x._2` returns the second element of a tuple (assuming `x` is a tuple).

scala - Apache-Spark : What is map(_._2) shorthand for ...

While Apache Spark 1.x gained a lot of traction and adoption in the early years, Spark 2.x delivers notable improvements in the areas of API, schema awareness, Performance, Structured Streaming, and simplifying building blocks to build better, faster, smarter, and more accessible big data applications.

Apache Spark 2.x Cookbook

Apache Spark 2.0.0 is the first release on the 2.x line. The major updates are API usability, SQL 2003 support, performance improvements, structured streaming, R UDF support, as well as operational improvements. answered Jun 25, 2018 by zombie. • 3,790 points.

Apache Spark vs Apache Spark 2 | Edureka Community

Send RDD or DataFrame jobs to Apache Spark clusters. Where ``rdd`` option refers to the name of an RDD instance (subclass of ``org.apache.spark.api.java.JavaRDDLike``) from a Camel registry, while ``rddCallback`` refers to the implementation of ``org.apache.camel.component.spark.RddCallback`` interface (also from a registry).

Spark :: Apache Camel

Jumpstart with Apache Spark 2.x on Databricks. Apache Spark 2.0 and subsequent releases of Spark 2.1 and 2.2 have laid the foundation for many new features and functionality. Its main three themes—easier, faster, and smarter—are pervasive in its unified and simplified high-level APIs for Structured data.
