Look Inside. Cognition: Theory and Practice provides the link between theory, experimental findings, and ordinary human activity, showing students how the field of cognitive psychology relates to their everyday lives. Engagingly written, the book captivates students by explaining common experiences such as why answering a cell phone while driving is as dangerous as closing your eyes for a half-second, but talking with your passenger for a minute can be perfectly safe.

Cognitive theory suggests that once an individual has experienced the negative thinking associated with anxiety and depression, there is an increased risk that he or she will develop maladaptive cognitive schemas, which, with repetition, can become entrenched (Beck, 1995). For many clients, a small amount of nervousness or disappointed expectations can trigger a rush of negative cognitions (e.g., "Terrible things will happen," "I am a failure," "I feel overwhelmed," "I can't ...
