The HeERO consortium is currently testing and validating in real conditions pilots the common European eCall standards defined and approved by the European Standardisation Bodies. The project is partially funded by the European Commission under the ICT PSP programme.

HeERO - About HeERO

The eCall service uses the common European standards defined by ETSI and CEN. After being made mandatory on cars from April 2018, the road transport stakeholders are now in a process of investigating feasibility of eCall implementation for all other types of vehicles, including trucks, long distance buses and coaches.

HeERO - About eCall

At European level, the HeERO project is preparing, coordinating and carrying-out pre-deployment pilot projects of the EU-wide eCall (based on the common European emergency number 112). The consortium is currently testing and validating in real conditions the common European eCall standards defined and approved by the European Standardisation Bodies.

HeERO - HeERO Newsletter - Issue 2

It addresses explicitly the PSAP element of the eCall. I_HeERO, (“I” for “Infrastructure”) is aimed at the preparation of the PSAP in Member States for the deployment of eCall based on 112 as reference implementations.

ABOUT I_HeERO: EN - I_HeERO

eCall vendors prove the maturity of their implementations ...

eCall based on 112, will be a reality in 18 months' time. On 28 April 2015 the European Parliament voted in favour of the eCall regulation requiring all new types of M1 and N1 vehicles (passenger cars and light duty vehicles) be equipped with eCall technology from 31 st March 2018. Despite nuances and concerns raised by the vote (such as privacy issues), eCall is a success story driven in
