Air filter and carburetor cleaning on 1998 Maruti esteem

One of the keys to tuning for weather is the carburetor setup, jetting in particular. Here's an example: when the thermometer rises, the density of the air decreases. That effectively decreases the available oxygen to feed the engine. Carburetor jetting should be reduced to compensate and prevent an over-rich air/fuel mixture.

How to Tune Your Race Car for Weather Conditions

TUNING THE IDLE CIRCUIT (PILOT SYSTEM) The first step in tuning any carburetor is to get the idle circuit correctly adjusted. And, the first step in this procedure is to adjust the pilot screw position for best idle. Mikuni sets the pilot screw at three turns open during assembly. This is the position we have found to be right most of the time.
