About four years ago I wrote an article for the old SQLMag website describing how to extract a Reporting Services RDL (Report Definition Language) file using PowerShell. In the article I described how to access Reporting Services using the WSDL (Web Service Definition Language) interface, and I wrote the retrieved definition to a file via the [system.io.file] object write method.

Extract All SQL Queries from Reporting Services Reports ...

Extract is not created: If your data set contains a really large number of columns (e.g., in the thousands), in some cases Tableau might not be able to create the extract. If you encounter problems, consider extracting fewer columns or restructuring the underlying data.
