Free Nicad Battery Repair Guide

Put this battery in a plastic bag and seal it properly. Make sure that the battery is dry and clean before placing it in a bag. Place this battery in the freezer for an hour or more. Remove the battery from the freezer. Clean it off if there are any water content or frost particles on the battery. Tap the battery now with the screwdriver.

How To Recondition NiCad Battery With Easy Steps Guide

The simplest way to repair is to use a capacitor because you can get a quick high voltage discharge from them. The most common capacitor used is from a disposable camera. Charge the capacitor to a voltage which is approximately 2-4 times the voltage of the cell. Now connect the battery to the capacitor with the same polarities together.
