Infrastructure Planning and Management. Introduction to Infrastructure; The Infrastructure Scenario in India; The Power Sector in India; The Water Sector in India

Infrastructure Planning and Management - NPTEL

Efforts to achieve IUWM/WSUD exist within a complex "Water Infrastructure Planning " and "Urban Planning" context. Decision-making and planning processes used within the water sector and the urban planning sector affect and govern changes to urban outcomes, including both urban form and infrastructure (Furlong et al., 2016c). Identifying the specific planning processes through which each of these sectors has an impact on urban outcomes is a complex task.

Infrastructure Planning - an overview | ScienceDirect Topics

Infrastructure planning and management is a growing, fast-evolving field. Governments, corporations and military organizations are experiencing a growing need for experts to help maintain and lead planning efforts to increase infrastructure systems' resilience against an increasing volume of threats. The Bureau of Labor Statistics (BLS) tracks employment information for several job titles related to this field.

Careers | UW Online - Infrastructure Planning & Management ...

The "traditional" infrastructure management course in engineering is focused on built infrastructures (e.g. highways, bridges, etc.) and the need for managing them across their life cycles - from design to decommissioning. It discusses budgeting, deterioration, and the technology behind building long-lasting concrete or pavements.
