recognizing that they exist and having an effective process for identifying them. Value Stream Mapping (VSM) is a Lean management method for analyzing the current state and designing a future state. It shows the flow of information and material as they occur.

The 8 Wastes of Lean

Get Free Lean Waste Stream Reducing Material Use And Garbage Using Lean Principles

The Lean theory describes 7 major areas where you can identify Muda activities, more popular as the seven wastes of Lean. 1. Transportation. This type of waste is when you move resources (materials) and the movement doesn't add value to the product. Excessive movement of materials can be costly to your business and cause damage to
