Use the chmod command to change the modes of access as you wish. You can use certain flags that serve as permissions to instruct kali to give what privileges to which user. r= lets a user read the file. w =enables a user to edit a file (write or delete). x = Grants permission to execute the file or search a directory.

The 22 most basic commands of Kali Linux - Linux Hint

As a beginner's guide it is helpful. It would benefit from being slightly longer and making a better explanation on a few points. There's nothing about trouble-shooting, and if anything doesn't 'work' one is left searching the internet for answers (which can be difficult as much that is out there relates to CentOS 6 and/or assumes more knowledge of Linux than a beginner would have).
