MRC Prodigy Advance Controller Fix - YouTube

I am currently having two issues with my MRC Prodigy advance squared system: 1. None of my locomotives will program on the program track, regardless of manufacturer or decoder type. I've checked for snug connection of wires, correct connection and any of the basics. However, they program fine on the main.

MRC Prodigy Advance Squared problems - Model Railroader ...

The Express 2 cab is compatible with other MRC systems as well. I connected it with the Prodigy Advance 2 system on the Model Railroader staff's Wisconsin & Southern layout and ran trains with no problem. Likewise, Advance 2 and Prodigy Elite cabs worked with the Express 2 command station.

MRC Prodigy Express2 DCC system | ModelRailroader.com

To that I've hooked up the MRC Prodigy Advance 2, running the two wires out of the main track connector on the unit, to the track. I turn it on, and when I put a train on the track, the train begins to move, lights, sound everything on. I've tried a basic Bachmann train, as well as two MTH trains, running proto sound lights etc.

MRC Prodigy Advance 2 & Setup - Model Railroader Magazine ...

And they say Digitrax manuals are ambiguous..ok, after reading the Advanced^2 manual, I think what they mean when they say enter 0-9 is to use the number keys and put in whatever sort of address you want - not that you can just use 0-9. So if you want to make the loco address 1234, just put in 1234 at the Addr prompt.

Problem with my MRC Prodigy Advance2 - Model Railroader ...

I have a prodigy system that I set back for a firmware upgrade to version 2 when the wireless throttles became available and I love it. I use a CVP booster with it and it's been a very reliable combination . The MRC system is easy to use and has worked well with many brands of decoders except some BLI steam stuff, but maybe that's just me.

MRC DCC Systems: Is there a Problem?

Addressing Using the MRC Prodigy Advance System. Short Address Changes. To change an M.T.H. HO locomotive's address on the Prodigy Advance system you'll need to use Programming on the Main or PoM mode. Programming tracks won't work with M.T.H. engines. So, if you want to change the short address that's very simply done by: 1. Apply power to the ...
