Parasitology An Issue Of Veterinary

Studies on rickettsial disease organisms (Ehrlichia, Anaplasma, Eperythrozoon) will be considered for publication in Veterinary Parasitology, but only if the paper deals with vector transmission of these organisms to domesticated animals, or if zoonotic. Studies on Rickettsia per se will not be accepted.

Dear Colleagues, Microorganisms and multicellular parasites are important to animal health and wellbeing and animal production. Many viruses, prokaryotic (archaea and bacteria) and eukaryotic (fungi and protozoa) species, and macroscopic parasites are pathogens and can cause serious disease in farm and companion animals.

Christopher Little and Alistair Boxall (VR , 25 January 2020, vol 186, p 97) called for a stop to the 'blanket prophylactic use' of antiparasitic drugs, and encouraged a return to strategic prescribing to minimise environmental exposure. Factors that might have brought about a change in prescribing practice are the emergence of pet health plans and client reminder services that aim for ...
