Processes. A stochastic process is defined as a collection of random variables  $X = \{X_t : t \in T\}$  defined on a common probability space, taking values in a common set  $S$  (the state space), and indexed by a set  $T$ , often either  $\mathbb{N}$  or  $[0, \infty)$  and thought of as time (discrete or continuous respectively) (Oliver, 2009).
