Radiologists without Borders

A radiologist is a type of doctor who specializes in medical imaging. Radiologists analyze images, such as X-rays, to help diagnose, monitor, and treat various conditions or injuries.

What is a radiologist? Everything you need to know

Like in many other high-pressure careers, radiologists can remedy these effects by maintaining healthy lifestyles, eating a proper diet, and getting support when needed. Since radiologists often work in hospitals or come into large volumes of people, they come into more contact with infectious diseases and other medical conditions.

Life-Saving Quotes - BrainyQuote

Early detection is the key to saving more lives. We developed the ClearRead applications with this need in mind. Due to technology advancements that generate more images, coupled with lower reimbursement rates, radiologists must become more efficient while maintaining high accuracy. ClearRead addresses both of these challenges.

Intelligence at Work: Riverain Technologies Clear Read

Changes outlined in new draft U.S. Preventive Services Task Force (USPSTF) lung cancer screening recommendations will greatly increase the number of Americans eligible for screening and help medical providers save thousands more lives each year. The American College of Radiology strongly supports the USPSTF proposal to lower the starting age for screening from 55 to 50 and the smoking history ...
