the substance or substances of which any physical object consists or is composed: the matter of which the earth is made. physical or corporeal substance in general, whether solid, liquid, or gaseous, especially as distinguished from incorporeal substance, as spirit or mind, or from qualities, actions, and the like. something that occupies space.

Matters | Definition of Matters at Dictionary.com
All normal matter surrounding us is composed of atoms, whose dense nuclei, comprising protons and neutrons, are surrounded by negatively charged electrons. Inside what are called neutron stars, atomic matter is, however, known to collapse into immensely dense nuclear matter , in which the neutrons and protons are packed together so tightly that the entire star can be considered one single enormous nucleus.
