Vertigo and Imbalance: Clinical Neurophysiology ...

Vertigo is a sensation of feeling off balance. If you have these dizzy spells, you might feel like you are spinning or that the world around you is spinning.

Vertigo: Causes, Symptoms, and Treatment

The most common causes of acute prolonged vertigo include a peripheral vestibulopathy, Ménière syndrome, migrainous vertigo, or brainstem or cerebellar ischemia. This discussion is limited to the distinction between a peripheral vestibulopathy and ischemia.

Vertigo and Imbalance: Clinical Neurophysiology of the ...

For example, vertigo, defined as an illusion of movement, indicates an imbalance within the vestibular system. However, just because a patient reports “vertigo” does not mean that the cause is a vestibular disorder; similarly, just because a patient denies vertigo does not mean that a vestibular disorder is excluded.

While imbalance and dizziness are common complaints in PCS, they can also be a sign of additional underlying pathology. In cases of specific dizziness symptoms or limited balance recovery beyond the initial post-concussive period, a quantitative vestibular assessment may also be needed.

Sports Concussions (TBI), Imbalance, and Dizziness ...

Vertigo—a sensation of rotation or linear movement of self or surroundings—occurs in discrete attacks that typically have an acute onset and are caused by neuro-otologic conditions. 2 Symptoms may last for seconds (benign paroxysmal positional vertigo [BPPV]), hours (Meniere's disease), minutes to days (vestibular migraine), or weeks (vestibular neuronitis).
