VW had 3 revisions. None of them are reliable. I'd avoid this. BLS - this one is with DPF I think and the cam is like in BRM with bad injector profile and prone to failure. BRU - This one is 66 KW engine. Too weak, I'd say, you might want something more powerful. Everything is the same as BKC engine, difference is only the ECU (different tune).

10 October 2009. #4. These special engines, the VW pd engines, are very severe on the oil, the mechanical fuel pump delivers fuel at approximately 25,000 psi!! to enable a very precise injector spray pattern which, in turn, gives excellent driving characteristics. The very high loads on the fuel pump will lead to VI improver shear down and oil viscosity loss if the engine is operated on lesser oils that ones approved for use in PD engines.
